EDUCATION

University of Waterloo

Bachelor of Computer Science

Waterloo, ON

Sep 2024 – Apr 2029

- **3.99/4.00 GPA (95.4%)**; Won **\$85 000** via 12 scholarships, including the Immigrants of Distinction Youth Achievement Award, Alberta Premier's Citizenship Award, and Cenovus Energy STEM Scholarship

EXPERIENCE

Toma

Software Engineer

Jan 2026 – Apr 2026

San Francisco, CA

- Project lead for outbound product: spearheaded full-stack redesign of **PostgreSQL** schema, data structures, and end-to-end workflows complete with de-duplication, actionable statistics, a complete UI overhaul, and observability; generated over **\$50k** in surplus revenue for clients in the first month of beta alone
- Lead engineer for an in-app dashboard and reporting modernization project; introduced new **React** data visualizations and cut worst-case load times by **4x** via **Temporal**, **Redis**, **Tanstack Query**
- Fulfilled on-call duties and oversaw product stability for the Series A automotive dealership AI startup, assumed responsibility for multiple external product integrations, served as project lead for an annual conference sales demo

Google Summer of Code (GSoC)

Open Source Contributor

May 2025 – Aug 2025

Waterloo, ON

- One of **8%** of applicants selected for the **Google**-sponsored open-source software development program
- Open-source contributor for the official **Anki** Android spaced-repetition flashcards mobile app (**10M+** downloads)
- Used **Kotlin** to completely re-architect the app's notifications, from backend data storage to frontend UI/UX
- Designed and implemented custom schema migration functionality, created modern permissions flow user journeys

Ford

Software Developer

May 2025 – Aug 2025

Waterloo, ON

- Integrated Apple CarPlay into Ford and Lincoln in-vehicle infotainment systems via **Kotlin**, **Android Studio**
- Implemented next-generation digital experience features including device status displays, the **SQLite** backend for an app discovery feature, and backend navigation data APIs in an extensive codebase
- Improved stability for a major version update by resolving multiple critical crashes; raised test coverage to **80%**

PROJECTS

Midnight Sun Solar Car Design Team | *Strategy Subteam*

Sep 2024 – Present

- Designed an irradiance and route model database system using **Python**, **AWS RDS**, and the Solcast API
- Achieved **45x** faster route model generation by optimizing **psycopg2-to-PostgreSQL** write operations

1st Place at MediHacks 2024 Hackathon

Jul 2024

- Developed a **ReactNative** mobile app together with **NativeWind** and the **Google Maps API** to help first responders react to emergencies, winning **\$2000** against **450+** contestants
- Processed emergency location data and chat messages using **Firebase** and **Nominatim API** reverse geocoding

1st Place at Hack The Change 2023 Hackathon

Nov 2023

- Created a **NextJS** app as part of a modular plant pot project, utilizing **Firebase**, **Tailwind**, a **Python Flask** server to receive data from an ESP32, and the **Google Maps API**; won **\$5000** against **250+** contestants

Co-Founder of Citywide Hackathon

Jun 2023 – Oct 2023

- Co-founded a city-wide high school hackathon, **led a nine-person executive team**, drew 100+ participants
- Attracted **\$2000+** in corporate prize funding from companies including Postman and Wolfram Alpha
